

Roller Blind Flyscreen Measurement Instructions

Print this sheet as an aid to measure your screen.

To Screen Single Windows

Measure reveal (plaster to plaster)

Take 3 width measurements: **(A,B,C)** in mm at the top, middle and bottom of the reveal. Record the shortest of these as the **WIDTH**.

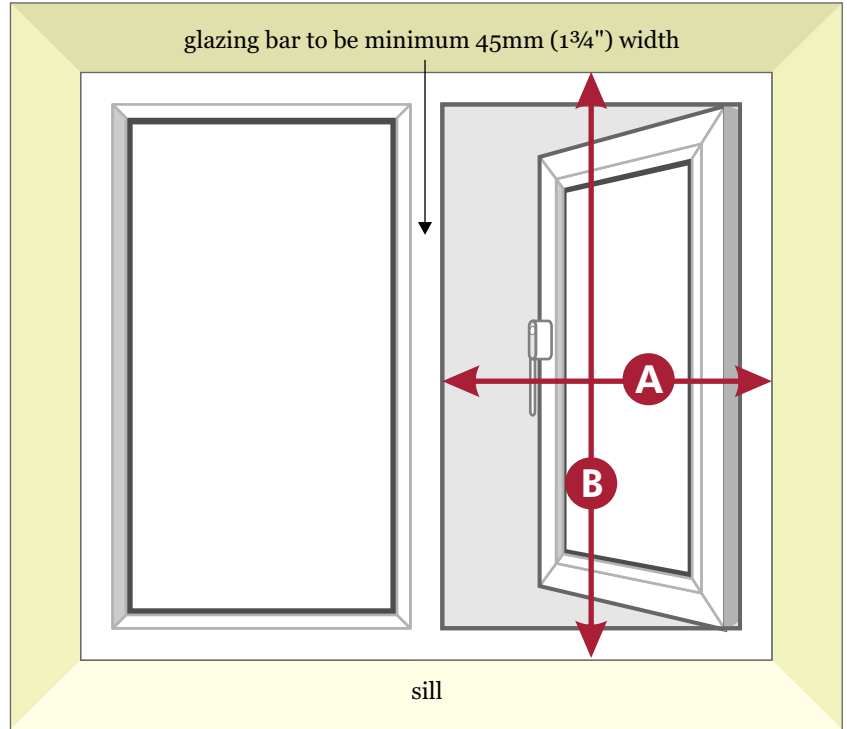

Take 3 height measurements: **(X,Y,Z)** in mm at the left, middle and right of the reveal. Record the shortest of these as the **HEIGHT**.

Record your measurements

WIDTH mm

HEIGHT mm

To Screen Opening Window Only

Open the window you wish to have screened.

Take measurement **(A)** from the reveal (Plaster at edge of window frame) to the far open side, **then add 30mm**, this will be your **WIDTH**.

Take measurement **(B)** from the top of the window frame down to the Sill, this is your **HEIGHT**.

Record your measurements

WIDTH mm

HEIGHT mm
